

# Nystrom Finds the Perfect Product Right Under Its Nose

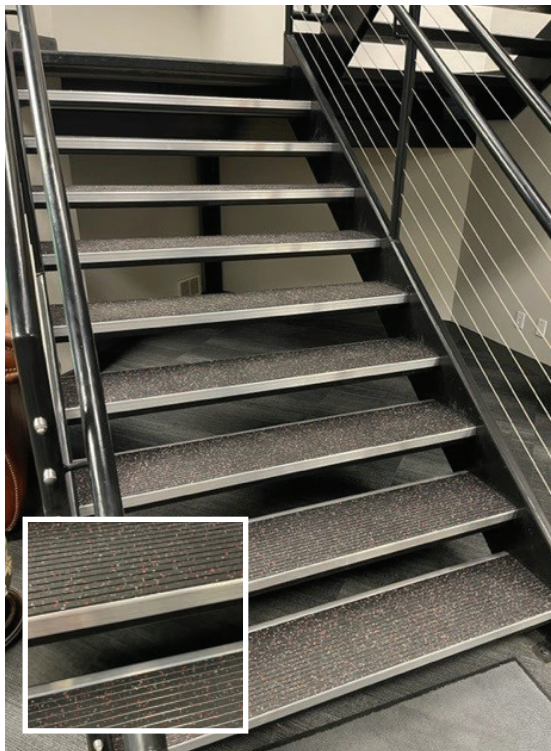

## STAIR NOSING PROVIDES SLIP RESISTANCE ALONG WITH SEAMLESS AESTHETIC

When it came time to install new stair treads on the Nystrom headquarter's staircase, we didn't have to go far to find the perfect product. The Nystrom team used our renovation stair tread model STRB-L11D-ECO-C14 for the open-riser stairs, which are a focal point in the office.

These stair treads provide slip resistance while maintaining the aesthetics of the building. With the wide variety of color choices, Nystrom was able to perfectly match the company's corporate color scheme with Red/Gray EcoTread™. These treads are wear resistant, easy to clean, and the individual treads can be replaced, if needed.

"Due to the considerable traffic our main staircase sees, the EcoTread™ product was the best choice," stated Rick Fanning, Nystrom Facilities Manager. "Not only because of the product's slip resistance and durability, but also for its sound dampening qualities."

There's a satisfaction and sense of pride that comes with being able to use your own product to meet inner office design needs. Nystrom looks forward to years of high-quality performance combined with superb office aesthetics.
